

00SO SLIP ON STOP COLLAR

ENGINEERING SOLUTIONS FOR DEMANDING WELLS CONDITIONS

High strength 00SO slip on stop collars are developed for use in challenging wells. They provide a high-performance method of securing and protecting centralizers on the casing string.

Made from the same material as our ultra-high strength centralizers, the 00SO robust design can withstand high axial forces, making them suitable for demanding well conditions. They are heat treated to increase strength and reduce brittleness.

Unique set screw design provides industry leading holding forces without excessive marring of wellbore tubulars.

Available with single and double-row HD set screw configurations depending on casing size.

PERFORMANCE RATINGS

CENTRALIZERS

00SO stop collars are designed for applications with Centek's premium range of centralizers for challenging wellbore sections

FEATURES AND BENEFITS

- Does not require 4" axial slippage to exceed the API 10D-2 performance standard
- Premium slip on stop collar
- Fitment tested to up to 50 lb-ft torque
- Anti-vibration screw retention
- Maximum performance on casing grades up to P110

TARGET APPLICATIONS

- Demanding well conditions
